

Boxed PSU range

A full range of advanced technology, general purpose power supplies with battery charging capability. All units have protection from AC input surges and transients; under and over AC power; over-heating and over-current; battery-reverse connection and over-current battery charge, substantially removing the need for engineer visits to rectify such problems.

- Greener advanced switched-mode technology
- Electronic fuse protection restores power automatically after intermittent power faults
- Battery charging capabilities
- Protection from AC power surges

There is virtually no heat produced meaning the power supplies can be installed almost anywhere without the need for noisy cooling fans. The unique battery charging feature reduces strain on batteries, thus prolonging their life. The self-resetting electronic fuses auto-reset after the problem goes away also helping reduce engineer call outs and the anti-'spike' filtering protects access system from downtime due to blown fuses caused by electric/magnetic door releases.

Code	Description	Amps	Battery Charging	Output Voltage
PSU-12/5AB	Boxed 5amp 12Vdc Power Supply	5	Yes	13.6
PSU-12/2AB	Boxed 2amp 12Vdc Power Supply	2	Yes	13.6
PSU-24/2AB	Boxed 2amp 24Vdc Power Supply	2	Yes	27
Dimensions - 260 mm x 320 mm x 90 mm				
'Green' technology will save at least 131KWh of electricity p.a. for each 1A unit
