#### Camera

Sarix Value IMV Series cameras are ideal for discreet surveillance with their compact size and design that blends in with surroundings. The Sarix Value Series features excellent image quality with great low light performance, color fidelity and true wide dynamic range (WDR) for increased visibility in difficult lighting situations. And with built-in IR illumination, the camera can provide coverage even in total darkness. The vari-focal lensing gives you the flexibility to set a range of fields of view.

With IP66 and IK10 ratings, the Sarix Value IMV Series can be deployed in a variety of indoor and environmental settings as well as in vandal prone areas.

#### Video

Sarix Value Series cameras provide options for three simultaneous video streams. The three streams can be compressed with efficient H.265, H.264 High or Main profiles, or MJPEG encoding. The streams can be configured to a variety of resolutions and frame rates. Pelco Smart Compression is available on both H.264 and H.265 to minimize storage and bandwidth utilization.

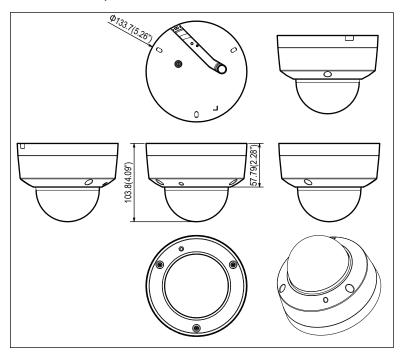

### Open and Integrated

Sarix Value Series cameras seamlessly connect to VideoXpert<sup>™</sup>, Pelco's video management system as well as other leading Video Management Systems via the ONVIF Profile S, T, and G Profiles.

#### **Dimensions**

#### **IMV229-1ERS, IMV529-1ERS**

Note: Values in parentheses are inches; all others are millimeters.

#### **Standard Web Interface**

Pelco cameras use a standard Web browser interface for easy remote setup and administration. Controls are optimized for convenient one-step camera configuration for features including color, exposure, flicker control, wide dynamic range, and streaming.

#### **Basic Analytics**

Sarix Value Series cameras feature basic video analytics including Simple Motion Detection, Camera Tampering, and Audio Detection.

Simple Motion Detection algorithms allow the camera to record or send an alarm when there is motion detected in a selected zone or within the entire scene.

A Camera Tampering alarm is triggered if the lens is obstructed or when the camera is repositioned.

An Audio Detection alarm is sent when the rise or fall of volume exceeds set limits, or when the input volume reaches a threshold.

### **Smart Compression Technology**

Smart Compression Technology lowers bandwidth and storage requirements by up to 70%. It allows the user to make informed optimization between storage savings and image quality.

**Product Specification, camera solutions** 

Pelco's Smart Compression Technology dynamically analyzes motion occurring within live video in real-time, to intelligently compress the information you don't need, while retaining details with clear quality in the areas that are important in the scene. By enabling Dynamic GOP, an added feature of Smart Compression, the number of I-frames are automatically reduced in scenes with low motion. Based on the complexity of scenes and presence of motion, up to 70% bandwidth savings can be achieved in scenes such as store rooms, that have limited entry and exit.
