Control Panels & Packs

SW-10270-RFT
SW 10270 RFT

Application:

Designed for larger domestic and commercial applications the SW 10270 incorporates both HKC's SecureWatch wired and SecureWave wireless technologies. The panel is a true hybrid and communicates with an extensive range of wired and wireless devices including life protection devices. A range of communicators and warning devices are also available to choose from. It is identical to its predecessor the SW 1070 except it: has up to 270 wire/wireless zones, works with the GSM-WiFi dual path communicator and is compatible with our new RF-Expander.

Specification:

- True Hybrid Panel
- Accepts all types of wiring configurations
- Expandable to 270 wired/wireless zones
