IA-STD

IA-PRO

Database Platform	Microsoft SQL Express 2014 SQL Local DB	
Windows Operating Systems	Win 7 / 8.1 / 10 Server 2012	
Unlimited No. of PCs	■	■
Unlimited Number of Cardholders	■	■
Real Time Access Events Viewer	■	■
Real Time Alarm Events Viewer	■	■
Visitor Management	■	■
Contractor Management	■	■
Controller Wizard	■	■
Door Wizard	■	■
Report Wizard	■	■
Door Open Time Zones	■	■
Timed PinPads	■	■
Group Time Zones	■	■
Issue Temporary Cards	■	■
Multiple Sites	■	■
Display User's Photo On Card Swipe	■	■
Users On / Off Site Counter	■	■
Photo ID Card Printing (NOTE 1)	■	■
Operator Remote Door Control	■	■
Configurable User Data Fields	■	■
Group Management	■	■
Integrates with Morpho Manager	■	■
Max Number of Doors	24	Unlimited
Max Number of Card Readers	24	Unlimited
Time Sheet Report	X	■
Fire Alarm Roll Call Report	X	■
Fingerprint Enrolment (NOTE 2)	X	■
AntiPassBack	X	■
Preconfigured Logic for Airlocks and Turnstiles	X	■

NOTE 1 Requires HID Asure ID License NOTE 2 Requires Morpho MACI License

Controlsoft

Software Guide

Simple System Management

Straight forward and easy to use – Identity Access is so visually intuitive, selecting the task you want to perform is really quick and simple.

Operator Dashboard

The screenshot displays the Identity Access Management (IAM) Operator Dashboard. The interface includes a top navigation bar with tabs for Home, View, Reporting, Management, Setup, and Tools. Below this is a toolbar with icons for Time Zones, Public Holidays, Companies, Groups, Employees, Visitors, Contractors, Identify ID Token, Identify User, Find Duplicates, BioBridge, and Asure ID. The main dashboard area is divided into several sections:

- User Status:** Shows the number of users ON SITE (4) and OFF SITE (1). A 'Reset' button is available.
- Controller Status:** Shows the number of controllers ON LINE (1) and OFF LINE (0). A 'Reload' button is available.
- Access Log:** A table displaying access events. The table has columns for Date, Time, Last Name, First Name, Reader, Location, and Token Number.
- Alarms:** A section for viewing system alarms, including a 'Clear' button.
- Doors:** A section for remote door control, including buttons for 'Refresh', 'Grant Access', 'Force Open', and 'Force Closed'.
- Reader Monitor 1 and 2:** Two panels showing user photos and access history for specific readers.

Callouts provide additional context for these features:

- User Status:** Real time view of how many users are on-site or off-site.
- Controller Status:** Real time view of network control units status.
- Access Log:** Alarm Viewer. The Operator can see all system alarms in real time. The Alarm window will appear over any other open windows.
- Doors:** Remote Door Control. The operator can either Grant Access through a door or unlock it until manually relocked.
- Reader Monitor 1:** Monitor selected readers to view users photo and recent history.

The bottom of the screen shows a Windows taskbar with various application icons and a system clock indicating 08:56 on 17/02/2016.

Complete Security

From small systems to global multi-site solutions, Identity Access provides complete building security management functionality built into a fully customizable, permission and event-based system. Friendly wizards, design templates and system configuration tools offer unparalleled ease of use.

User Management

The individual access rights of employees, visitors and contractors can be assigned according to their responsibilities to include one or more restricted areas with individual time restrictions for each access control point.

Mobile Credentials

Issue mobile credentials from within the software as easily as adding a token.

Group Management

Multiple Users having identical access control rights can be assigned to a single Group. Any changes subsequently made to the group then immediately apply to all members in that group.

Time Zones

A quick and easy way to control the days / times that users can gain access or clock in. Time zones can also control a door for "free access" at defined times of the day so users can freely enter or exit without showing a card.

Biometrics

Enrol Users fingerprints and manage access permissions to readers.

User Time Sheet

Users' time & attendance events can be recorded and displayed by day, week or month in a Time Sheet Report.

Photo ID Card Printing

Create templates and print personalised ID cards.

Fire Alarm Integration

Integrate the access control system with your Fire Alarm system so that selected doors automatically open in the event of a Fire Alarm activation.

Import / Export Data

User data can be imported directly from an Outlook vcf file or from a third party system. Time & Attendance data can be exported in various formats (e.g. Excel, CSV) using our Export wizard which makes the task very straightforward.

Reports

A complete security system must include full auditing and reporting capabilities. Our Report Wizard provides software operators with the ability to create and customise their own specific reports from within the Identity Access application.

Software Operators

System administrators can configure the permission levels for operators of the software application. From operators with wide-ranging responsibilities to those with single function duties, Identity Access enables administrators to assign an individual username and password and tailor their operators' system experience directly to their jobs.

Fire Alarm Muster / Roll-call Report

When the fire alarm is activated, a list of who is on site can automatically be printed. This report can be set to print again after a few minutes. (This feature requires reader in/out on entry/exit doors).

Software Availability

Supplied on a flash drive (part number IA-STD) or download from our website.

System Requirements

Recommended hardware:

Intel i5 Processor @ 3Ghz
8GB RAM
100GB Free Disk Space
Network Card
USB Port

One of the following operating systems:

Windows 7, 8.1, 10
Windows Server 2008 R2
Windows Server 2012 R2

Experts in Access Control, focussed on Excellence

Controlsoft have over 25 years experience in the development, manufacture and distribution of Access Control Solutions.

Controlsoft's evergreen, open architecture design takes advantage of the newest and best technologies today, while provisioning support for future technologies so that our solutions will deliver your needs now and in years to come.

With over 10,000 systems in daily use around the world, we are reliable and committed to excellence in our products, customer service and support.

In addition to our own products, we distribute many third party products in order to deliver the complete solution to our partners. These include HID (Readers, Credentials and Fargo card printers), Allegion (Hand Readers), Safran Morpho (Fingerprint Readers), Third Millennium (Readers) and Iris ID (Iris Readers).

Controlsoft believe in long term partnerships with both our Customers and Suppliers.

Please visit our website **www.controlsoft.com** for the most up-to-date datasheets and installation guides for all our products.
