Security Light & Camera

**DETER-DETECT-DEFEND**

Blue Strobe Light

Integrated Infra-Red Light

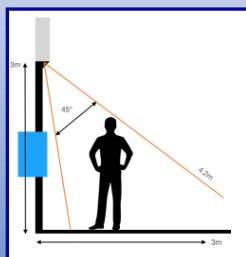

White LED Light

**ATM Sentry protects sensitive assets without being obtrusive  
12 volt device delivers multiple security functions**

- **Digital PIR Sensor reliably detects presence at night**
- **Integrated day / night overview camera adapts intelligently to conditions**
- **White LED illuminates on movement and allows colour images at night**
- **Flashing blue LEDs strobe when alarm is triggered attracting attention**
- **Energy Efficient 12 volt device with LED linear lighting - Maintenance free**

**The White light will only operate at night when someone approaches the area immediately in front of the unit and will turn on gradually. If the alarm input is triggered then the white light is disabled to maximise the impact of the blue strobe, an effective deterrent and incident alert for Police.**

**An integrated camera provides colour surveillance during the day or when the light is on, giving an ideal perspective angled down to the target at 45 degrees. At night clear images are supported by the linear Infra-Red LEDs**

**The security deterrent device is ideal for bank ATM's, Home security, rural locations, railway sidings, High risk areas & crime hot spots.**

**The unit can be mounted on a wall or under an overhang such as a fascia sign or soffit. Optimum mounting height is 2.5 - 4m**

## Security Light & Camera

### DETER-DETECT-DEFEND

#### Infa Red Camera

**At night the integrated IR LEDs turn on and the camera switches to monochrome mode. Linea Infra Red LEDs give an even illumination over a wide area “without hotspots”**

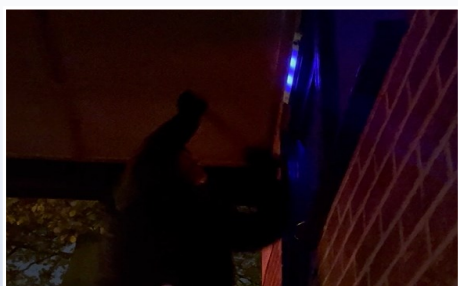

#### Security Light

**If a person approaches the protected area at night the white LED turns on and the camera reverts to colour mode. The illumination provides additional comfort to an ATM user at night and will turn off 60 seconds after they leave the area.**

#### Colour Camera

**During daylight hours the camera provides wide angle, overview surveillance with high resolution colour images for recording onto a CCTV system**

#### Alarm Strobe

**If an alarm is triggered—such as ATM attack the flashing blue LEDs strobe to alert law enforcement and create an effective deterrence. The white light turns off and IR turns back on to give crisp video of the alarm event—unaffected by the strobe.**

Part Number	NS - 30VRC ( with Camera)
White Light	900 Lumens @4000K with soft start
IR LED Light	840nm
Power	12vDC 12W
Dimentions	385X30X30MM
Alarm	Momentary alarm input to trigger blue strobe
Detection	4-5m DigitalPIR45* H detection zone
Camera	700TVL day/ night camera 0.01 lux
Lens	2.5mm with Ircut filter F2.0
Field of View	110* Horizontal 90* Vertical
Weatherproof	IP- 65
Vandal Rating	IK7 with security retaining screws
Construction	Aluminium alloy & ABS
Mounting	2.5 - 4m high to wall / ceiling / overhang
Warranty	12 months
