LOCINOX-ELECTRADROP-R-9005

Motorised electrical drop bolt

Electric 24V drop bolt with 120mm throw for safe locking of automated swing gates. The long-lasting internal batteries automatically lift the drop bolt in case of a power outage, eliminating the need for a key, thus assuring a free exit of the premises. By securing your gate with an Electradrop you add an additional secure latching and disburden the electric gate motors.

Features

- Vandal-proof, powder coated aluminium housing
- To be connected to the warning light on automated gates (min 3 sec pre-warning signal) or directly on the gate automation
- Automatic detection and memorisation of the continuous or pulse signal
- Mechanical release possible (by key) in case of emergency
- The integrated obstacle detection will automatically stop the drop bolt movement in case of overpressure to avoid injuries.

Technical Information

- Throw: 120mm (with the exception of Electradrop-ZILV: 115mm)
- Drop bolt diameter: 20mm
- For gate profiles: 40mm or more
- 5m cable included
- Power consumption: Normal: 25W / Peak: 55W / Standby: 0.2W
- Included: 3012-37-STD cylinder
- To connect to a Locinox PowerStone 60W
