

21.5" and 32" Full HD, LED Input Monitor – HDMI, VGA and BNC (32" only)

VM215e & VM32

Above: VM215e connectors

Above: VM32 connectors (USB for future development of firmware)

The VM215e (21.5") and VM32 (32") monitors produce high resolution, high contrast images via standard HDMI and VGA inputs.

In addition, the VM32 provides a BNC In and Out passive loop through allowing the monitor to be used for CVBS images with no loss in image quality. This makes it ideal for use as an entrance monitor displaying a local CVBS camera image which is then transmitted back to a DVR for recording.

Both monitors benefit from an Energy Saving Mode reducing running costs and environmental impact – lowering consumption to less than, or equal to, 0.5Watt.

A fast response 6.5mS and 8mS (respectively) reduces motion blur.

An intuitive multilingual menu system inc. English, French, German, Spanish and Italian, makes the monitors simple to set-up.

The monitors are supplied with a desktop plinth and VESA mounting capabilities via VESA 75x75 and 200x100, respectively. Therefore, the monitors can be mounted anywhere in combination with our VESA mounting bracket offerings.
