

18 way termination unit in a steel enclosure

S399TERM

A general-purpose low voltage termination unit with 18 separate pass through termination points. Provided in a robust steel powder coated enclosure.

Ideal for terminating third party equipment such as fire alarms, access control systems, building management systems to our door interlock systems, negating the need for technicians to enter other 3rd party enclosures.

Features and Benefits

- Enclosure protection rating IP66
- Robust steel enclosure
- Enclosure dimensions 150 x 150 x 80mm
- Each termination point is rated at Maximum 10A 30vdc
