DIMENSIONS (mm)	208 (W) x 230 (L) x 115 (H)	384 (W) x 230 (L) x 115 (H)
INTERFACES	RS232 for PC Programming software 2X00PC and PC Concierge software 2217	
FUNCTION AND OPERATION	<p>Audio/Video concierge station for the VX2200 digital system where a concierge operator is required. The concierge station can intercept calls made from digital panels which can then be transferred to a specific apartment and enables calls from different apartments to intercommunicate with each other. It has 3 operating modes (OFF, DAY and NIGHT mode). When in OFF mode calls made from a digital panel to an apartment will bypass the concierge and call through to the apartment directly. When in DAY mode any calls made from a digital panel will be intercepted by the concierge station first before being transferred to an apartment. When in NIGHT mode any calls specifically for the concierge can be answered by the concierge station, otherwise calls made to a specific apartment will bypass the concierge station and call directly through to the apartment.</p>
