NEW PRODUCT UPDATE

Vista Varifocal Network Cameras with Dual Light & Smart ISP

- 4MP resolution & motorised varifocal lens
- Dual Light illumination up to 50m
- IP67 Rated
- H.264/H.265 compression
- ONVIF Profiles – S, G, T
- 9:16 Corridor Mode
- Smart ISP Nightview technology
- Analytics: cross line and intrusion detection
- Turret & corresponding junction box also available in black

NEW PRODUCT UPDATE

Hikvision TalkVu Intercoms (KV8114) series

- 4 options in series
- Name tag or keypad
- Single or multi camera support
- Face, Bluetooth, MiFare, DesFire, QR, PIN
- IP66, IK08
- Wifi, Bluetooth or RJ45
- 12VDC or PoE+
- Hik Connect supported
- AI analytics for video and audio

NEW PRODUCT UPDATE

Paxton Paxlock Pro 2

- Wireless Access Control Door Handle
- Supported by Net2, Paxton 10 or standalone
- EN179 certified
- IK10 and IP55
- Privacy button on secure side
- Fire tested FD30 and FD60 doors

NEW PRODUCT UPDATE

Hanwha Vision Industrial PoE Injectors

- Compact size
- With or without SFP
- Support of 15, 30, 60 & 90W PoE
- DIN, Wall or Magnetic mount
- Integrated mains PSU
- -40 to +75°C
- DIP switch settings for extended distances &
- PoE pass-through

NEW PRODUCT UPDATE

Tachyon Networks TNA-303L

- New Small Form Factor Wireless TX/RX
- 60GHz useful for built up areas where 5GHz is swamped
- Can be Access point or station
- Up to 32 clients in access mode
- Point to Point
- Point to Multipoint

Tachyon Networks®

NEW PRODUCT UPDATE

TP-Link Omada Network switches

- Easy to use with plug-and-play design and simple configuration
- Remotely access logs and receive real-time alerts of networks
- Free and easy centralised cloud management via Omada essentials
- Easily configure surveillance features like 24/7 camera monitoring and automatic recovery

NEW PRODUCT UPDATE

Hanwha Vision BLAZE VMS

- Next generation Hybrid VMS
- Designed to unify Hanwha AI cameras
- Scales to single site to multisite installation
- On Prem/Cloud management
- Support of Audio and Intercom
- 3rd party product support
- Simple fail over server support
- Semantic search
- BLAZE appliances loaded with device licences

NEW PRODUCT UPDATE

Axis – RADAR detectors

- Two new models
- 180° and 270° options
- 360° version now available D2124-VE
- Supported PTZ can be integrated (Artpec-9)
- RADAR auto tracking for PTZ
- Suitable in all weather conditions
- Up to 140m human recognition
- Vehicles up to 200m
- Dynamic LED
- IP66 and IK10

Cable Guide
Network Cables

Fire terminology

Key: Stocked Not stocked

LSZH — **Low Smoke Zero Halogen**
One type of cable sheath. Can be abreviated in 4 ways:

- **LSZH** Standard Term
- **LS0H** Numeral zero
- **LSOH** Letter 'O' for zero
- **LSHF** Halogen Free

What it means in a fire:

Low Smoke (LS)
Better visibillity for escape.

Zero Halogen (ZH/0H/OH/HF)
Fewer toxic, corrosive gases.

Aca	**Non-combustible** Rarely used for cables	
B1ca	**Very limited flame spread** Rare, specialist high-risk sites	
B2ca	**Limited flame spread** Commercial, hospitals, public, tall buildings	**LSZH** Used instead of Cca
Cca	**Restricted flame spread** Not stocked - B2ca exceeds it	
Dca	**Moderate flame spread** Lower-risk buildings	**LSZH**
Eca	**Basic flame resistance** Minimal risk, basic specs	**PVC and LSZH**
Fca	**No performance stated** No fire requirement	**External cables** e.g. PE

Construction terminology

U/UTP

- No overall shield and no shield on the individual pairs. This is the standard unshielded cable.
- It's the cheapest, lightest and easiest to terminate.
- Good for standard office and home installs where there's little electrical interference
- It copes less well with interference and, at Cat6A, crosstalk between neighbouring cables (alien crosstalk).

U/FTP

- No overall shield, but each of the four pairs has its own foil shield.
- The pair shields block crosstalk between pairs and between neighbouring cables, which makes it a popular choice for Cat6A and 10G.
- It's usually smaller in diameter than F/FTP and quicker to terminate than fully shielded cable.
- It has no overall screen, so it gives less protection against external interference than F/FTP.

F/FTP

- It has foil around each pair and another foil layer around all four pairs together.
- It gives the best protection against interference, both from outside and between cables.
- Suited to electrically noisy environments, dense containment, and high-performance or 10G installs.
- It's the most expensive and the bulkiest, and needs proper earthing and shielded connectors.

NEW PRODUCT UPDATE

Tech tip

- Concerned about a break in whereby the NVR might be stolen, leaving the end user without any recorded footage.
- There are many ways to overcome this, but two simple low-cost options could be considered as follows:
- Install SD cards in just the critical cameras
- Consider back up storage to the cloud for critical cameras.
- For further information just give your account manager a call.

November SALE

- Make the most of our special offers this month!
- Huge discounts to be had on a range of products

Check out the Clearance page on our website for details:
